

INTRODUCTION

DIGITAL MARKETING

Digital Marketing refers to the practice of promoting products or services using Digital technologies and platforms. It involves various strategies and techniques to reach and engage with a target audience online.

As a part of Digital Marketing Internship, we got to do a project in a team of 5 members. The goal of Digital Marketing Internship is to increase Brand Awareness, Drive Website traffic, generate leads and ultimately, boost sales and business growth of the company allocated to us.

OVERVIEW

As a part of our Digital Marketing Internship from The Smart Bridge, we ought to do a Comprehensive project for Digital Marketing in which we were allotted with the topic CADBURY. This project report summarizes the objectives, strategies, results and challenges of the Digital Marketing Project conducted by our team for CADBURY.

The Comprehensive Digital Marketing for CADBURY includes, Brand Study, Competitor Analysis & Audience Persona. It also consists SEO & Keyword Research Analytics. It also contains Content Ideas and Marketing Strategies & Content Creation & Curation.

PURPOSE OF THE PROJECT

The main goal of this project is to increase the online presence and visibility of the brand, products and services. We used various strategies and tools such as SEO, social media, email marketing, content creation and analytics to achieve this goal. We also monitored & measured the performance and impact of our digital marketing efforts using key metrics and indicators.

This project will help CADBURY Inc. to reach new customers, engage existing ones, and grow the business in the competitive digital landscape.

LITERATURE SURVEY

A Literature Survey of Digital Marketing project is a systematic review of the existing research and publications on the topic of digital marketing. It aims to identify the main themes, methods, challenges, and opportunities in the field, as well as to provide a critical analysis of the strengths and weaknesses of the current knowledge.

A literature survey of digital marketing project can help to define the research problem, formulate the research questions, and justify the research objectives and methodology.

EXISTING PROBLEM

One of the main challenges in the digital marketing project is to increase the conversion rate of website visitors. We propose to implement a personalized recommendation system that will suggest relevant products or services to each visitor based on their browsing history, preferences and behaviour. This way, we can increase the engagement and loyalty of our customers, as well as the revenue of our business.

Other problems may include lack of clear and consistent communication among the team members. This leads to confusion, delays, and errors in the execution of the tasks.

PROPOSED SOLUTION

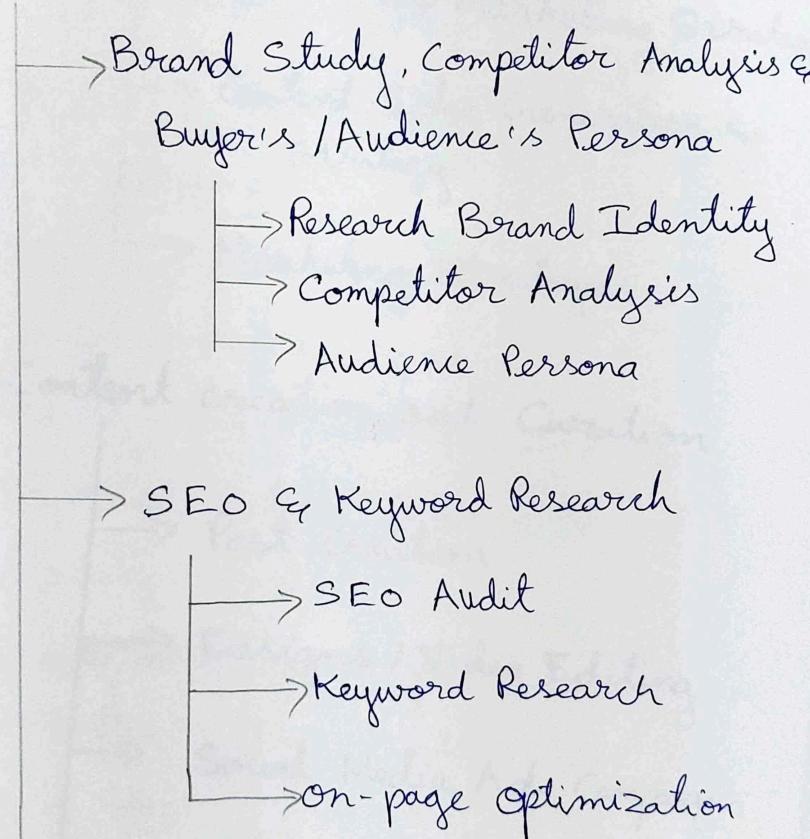

A possible solution for the existing problem of digital marketing project is to use a data-driven approach that leverages the latest tools and techniques in the field. By analyzing the customer behavior preferences, and feedback, we can design & implement a personalized and effective marketing campaign that meets their needs and expectations. This way, we can increase the conversion rate, retention rate, and customer satisfaction, as well as reduce the cost and time of the project.

To address the issue, we need to establish a regular and effective communication channel.

Content Creation and Curation (Post creations, Designs/Video Editing, Ad Campaigns over Social Media and Email Ideation and Creation)

Reflect on the content creation and curation process, discussing the challenges faced and lessons learned.

- Our team, consisting of Vatsalya, Priya, Soujanya , Kharishma and Anvitha have learned a lot from the content creation and curation process.
- Some of the challenges we faced were finding reliable sources, organizing the information, and presenting it in an engaging way.
- We overcame these challenges by conducting effective research, evaluating the credibility of sources, and using various tools viz. canva & vn editor and techniques to create and edit content.
- This process helped us improve our skills and knowledge in digital marketing as a project team

HARDWARE / SOFTWARE DESIGNING

The software design process for a digital marketing project involves several steps such as

Choosing the appropriate platforms and channels to reach the target audience, such as websites, social media, email or mobile apps.

Creating a user interface (UI) and user experience (UX) design that is attractive, intuitive and engaging for the target audience, such as using colors, fonts, images, or animations. Here, I used CANVA for designs and VN editor for video editing.

Developing a content strategy that delivers relevant information to target audience, such as using keywords, headlines & calls to action.

Defining the goals & objectives of the project, such as increasing brand awareness, generating leads, or improving customer loyalty.

Identifying the target audience and their needs, preferences, & behaviors, such as demographics, psychographics, or online habits.

The appropriate channels we chose for audience reach are Facebook Ads, Meta Business Suite, Instagram Advertising.

For Email Marketing I chose Mailchimp and Klaviyo. For SEO, the platforms were SEO optimizer, SEMrush and Ubersuggest.

Testing and evaluating the software design before launching it, such as using analytics, feedback, or usability testing.

ADVANTAGES & DISADVANTAGES

Digital Marketing has several advantages and disadvantages compared to traditional marketing methods.

ADVANTAGES

It can reach a large and global audience at a low cost.

It can be easily measured and analyzed using various tools and metrics.

It can be customized & personalized to target specific segments or niches.

It can enhance customer engagement & loyalty through interactive & creative content.

DISADVANTAGES

It can be affected by technical issues, such as slow loading, broken links, or security breaches.

There is a possibility of not reaching to some members as there may be no internet connection to some areas.

It can face high competition and clutter from other online sources.

It can be vulnerable to negative feedback or reviews from dissatisfied customers or competitors.

It can raise ethical and legal concerns, such as privacy, spam, or plagiarism.

APPLICATIONS

Some Applications of Digital Marketing include:

SEO [Search Engine Optimization] :

Improving the visibility and ranking of a website on search engines.

Content Marketing :

Creating and distributing valuable, relevant, and consistent content to attract & retain a clearly defined audience.

Social Media Marketing :

Using social media platforms to connect with and influence potential & existing customers.

Email Marketing :

Using email to communicate with prospects and customers.

CONCLUSION

In conclusion, this digital marketing project has achieved its objectives of increasing brand awareness, generating leads, & boosting conversions. The project has utilized various online channels & strategies, such as social media, email marketing, SEO & PPC to reach the target audience & communicate the value proposition of the product. The project has also measured & analyzed the performance of each campaign using relevant metrics and tools, such as Google Analytics, Facebook Insights, & mailchimp. It has evaluated the results of each campaign & suggested some ways to improve and grow.

FUTURE SCOPE

Digital Marketing has a huge and bright future scope. It is a fast-growing sector that uses various online strategies and channels to reach and engage customers.

It can help businesses to improve their online presence, generate more leads, increase sales, and retain customers. It can also help businesses to improve their online presence and adapt to the changing market and technology, & to gain insights and data for optimization & measurement. Digital marketing project can also foster innovation, creativity, collaboration, & networking.
